

Decades of experience in Testing, Standards Development & Equipment

We help get your RF and EMC testing to the next level. In today's busy world it is not always possible to be an expert in all aspects of testing. That is where we come in to educate and offer our experiences.

- Just getting started and don't know where to start?
- Have equipment but need training?
- What are the best options for the best value?

Get unbiased knowledge and solutions

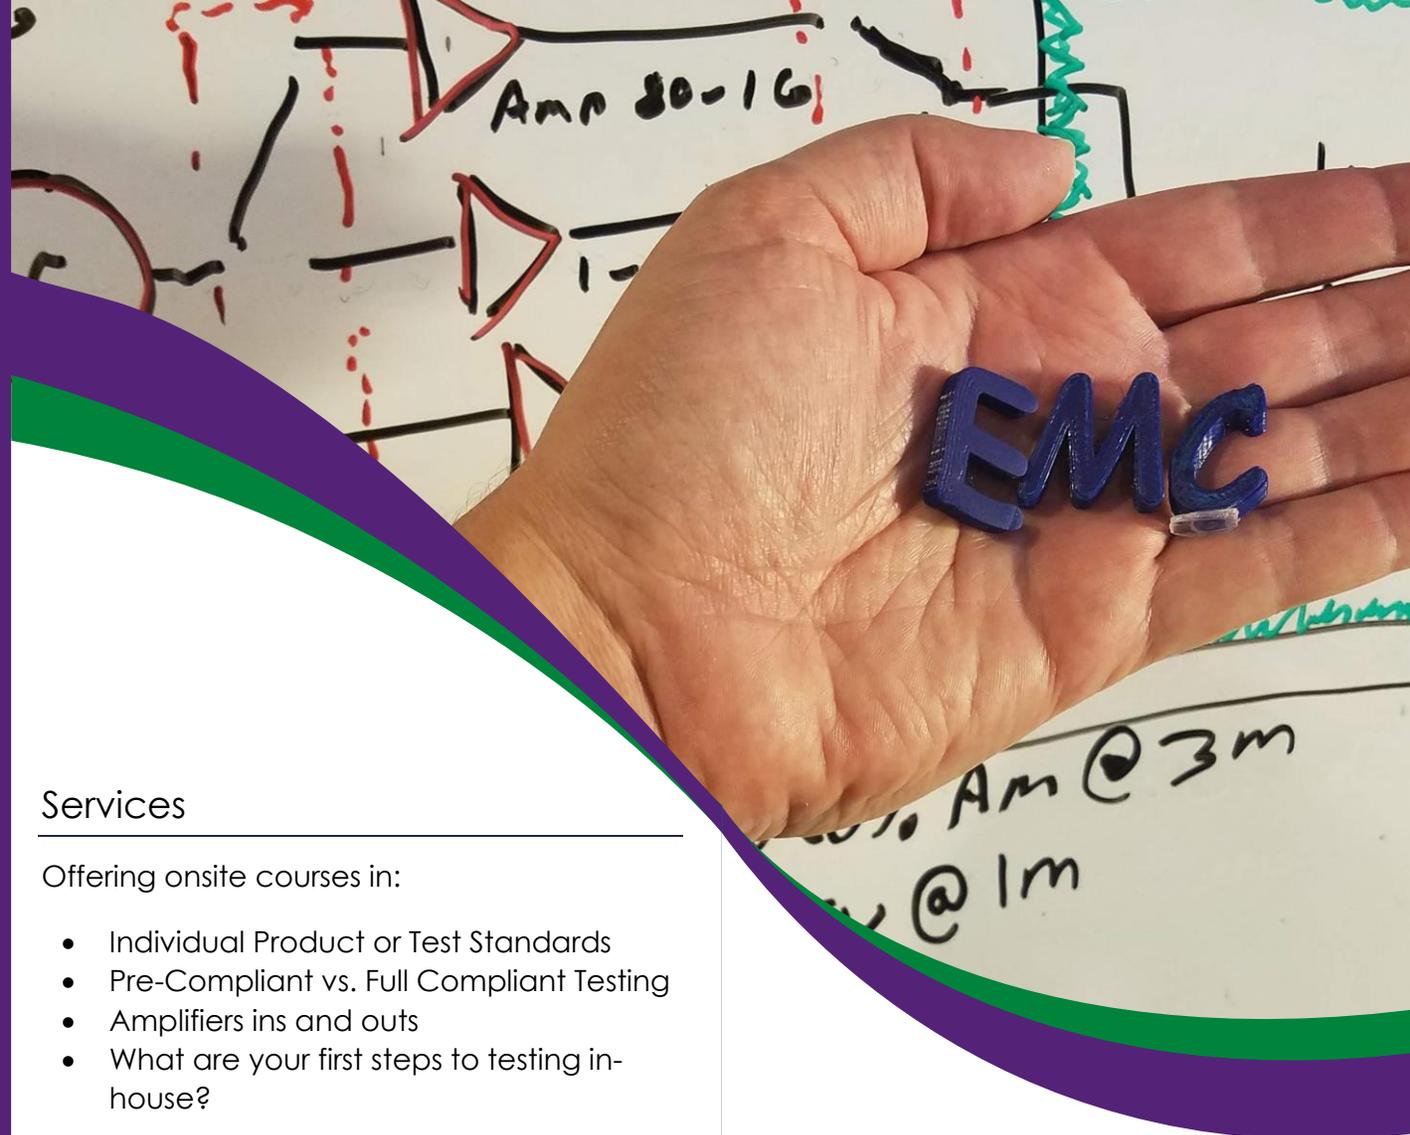

Services

Offering onsite courses in:

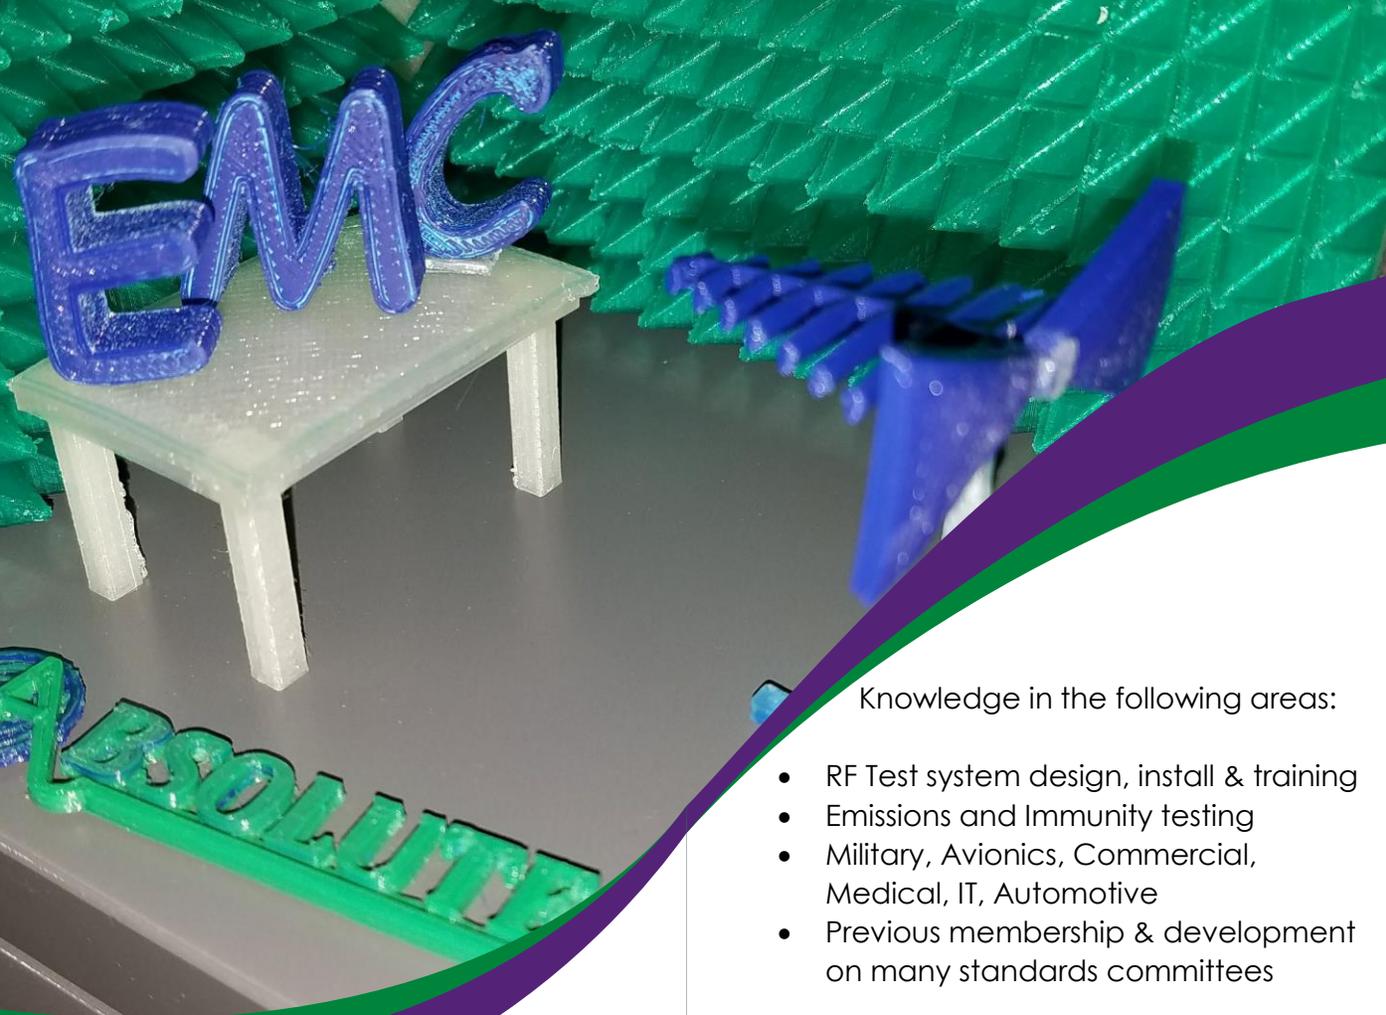

- Individual Product or Test Standards
- Pre-Compliant vs. Full Compliant Testing
- Amplifiers ins and outs
- What are your first steps to testing in-house?

Consulting in:

- Test Lab setup or improvement
- Test Lab audit on best practices
- Equipment suggestions and selections
 - Unbiased Pro/Cons
- Vendor suggestions
- Cost analysis

EMC Test Equipment Consulting

Testing is a way of Life

To perform EMC testing effectively and efficiently you need to understand a vast amount of information. Where does one learn this? Where does this knowledge come from? Experience. The market has a growing need for more and more EMC testing than the available expertise. Absolute EMC is here as a resource for all skill levels. Even the seasoned EMC veteran may need some help from time to time.

Knowledge in the following areas:

- RF Test system design, install & training
- Emissions and Immunity testing
- Military, Avionics, Commercial, Medical, IT, Automotive
- Previous membership & development on many standards committees

Experience

Over 20 years of experience in all phases of EMC testing in the lab. Work in Technical Applications and Sales for some of the industry's largest manufacturers extends our expertise beyond just testing, becoming experts on the equipment being used. Knowing the ins and outs of the amplifier or receiver is a requirement to know how to meet the standard. Get up to speed today with a training course.
