

## Field of application and characteristics

The **opto1394** system can be used for the optical transmission of IEEE1394/Firewire-signals at transmission rates of up to 400Mbit/s (800Mbit/s at 1394b). It consists of two identical battery supplied transceivers connected to each other with an optical fiber. With the optical transmission and the shielded case, the system is well equipped for EMI and EME tests.
