

Field of application and characteristics

The **BV15S** power supply can be used for the supply of mobile devices with a regulated voltage of 3 ... 15V.

The system has two integrated batteries and an adjustable voltage regulator. The voltage can be monitored with a volt meter.

Technical data

Output voltage:	+ 3 ... 15 V DC regulated, adjustable
Output current:	max. 500mA (internal fuse)
Output connectors:	4mm banana plug / pole terminal
Power supply:	2 x 9 NiMH cells with 2,5Ah (10,8V)
Dimensions:	185mm x 180mm x 105mm shielded aluminum case with rubber protectors
Weight:	approx. 3000g
Misc:	other voltages available on request
