The CAR PS XX-XX is a power supply for the HILO CAR-TEST-SYSTEM. It is controllable on the front panel or via HILO-Remote software. Thus, it is used as battery supply for up to 70V Systems with up to 200A current.

Furthermore, via the HILO-Remote software, the PS XX-XX can simulate amplifier waveforms according international and manufacturer standards like pulse 2b, pulse 4 and starting profile up to a battery current of 200A.

The software program CAR-Remote permits the PC control of the generator via Ethernet and allows the standardized documentation according to IEC 17025 and the evaluation of test results.

It is equipped with an Impulse Recording Function (IRF) to record definite impulses (with oscilloscope).
