

PRODUCT: Vdips Sense—Voltage Dips and Interruptions Verification Check Jig

TEST STANDARD: EN 61000-4-11: 2020

The Vdips Sense has been developed with EMC and manufacturers test laboratories in mind to enable a “go / no-go” verification of the Voltage Dip generator output prior to test. The Vdips Sense measures duration of interruptions on the mains supply from 2 ms up to 20 s. This gives a very quick repeatable check to ensure that the generator is operating as intended prior to commencement of test.

Vdips Sense

Technical Data:

Overall Dimensions

- Height 150 mm
- Width 90 mm
- Length 65 mm

Power

- 9V Alkaline PP3, approximately 2 hours continuous use

Input Voltage

- 90 to 250 Vac (50 / 60 Hz)

Interruption Measurement Range

- 2 ms to 20 s duration measurement

Connections

- Shrouded 4 mm Banana Plug sockets

Warranty

- 1 year

The Vdips Sense comes in a waterproof hard carry case for protection, complete with shrouded connection leads for connection to the dips generator.
