

Controller FCU^{3.0} – S lite

The controller FCU^{3.0} – S is suited for the operation of one device with one axis of motion. Usually, the FCU^{3.0} – S lite is used for turntables, antenna stands, cable guide rails or any other positioning device with one axis. Furthermore, the FCU^{3.0} – S lite permits the operation in manual, semi-automatic and remote control of one device simultaneously via Ethernet.

Technical data:

Ports	1x LAN, 1x Fibre optic
Transfer rate	100 Mbit/s
Voltage	100 V – 240 V / 50 Hz – 60 Hz
Current consumption	max. 20 W
Fuse	2x T1,6 A
Size in mm (W x D x H)	100 x 105 x 40
Temperature range	5°C – 40°C
Total weight	600 g
Accessories	mcApp lite HSU ^{3.0} handheld service unit MaturO dongle USB – network adapter

Requirements for existing PC

- Windows 7 32/64bit or better
- .NET Framework (included with mcApp software)
- 1 GB RAM
- 1 GHz Processor
- 5.5 GB disk space

Brief description FCU^{3.0} – S lite

The FCU^{3.0} – S lite works with EMC software from Rohde & Schwarz, Teseq, NEXIO, Toyo, TDK, Dare!!. LAN (TCP/IP) is used as interface. A software, which allows an automatic measurement procedure, can be programmed by Python, Matlab, C++ and C# easily. Existing devices with a GPIB interface can still be used in parallel to FCU^{3.0} – S lite.

Highlights:

- mcApp lite
Installation on an existing PC
Software to control all axis of all devices

Home screen of the mcApp lite

- Handheld service unit (HSU^{3.0})
Moving the positioning device manually, without FCU^{3.0} – S lite e.g.: for initial installation
Update capability and readout of error logs of the positioning devices via USB
- Matur dongle for lite version
USB stick Type – A
necessary for running the devices
