Description

CG50/500ML Comb Generator serve as reference signal sources designed for testing Line Impedance Stabilization Networks (LISN). It generates harmonics aligned with the fundamental frequency within a frequency band ranging from 50kHz to 108MHz, with a switchable step size of 50kHz or 500kHz. This flexibility enables thorough checks and investigations on conducted measurement systems, facilitating usage with LISN and standard connectors for both conducted and radiated emission measurements in EMI Chambers. The battery, when fully charged, ensures continuous operation for up to 16 hours. Included with the Comb Generator are a battery charger, USB cable, and accessories packaged in a storage box.

Application

The main purpose of a Comb Generator is to efficiently validate setups for conducted & radiated emissions testing. Its primary application lies in troubleshooting conducted measurements using a LISN and EMI Radiation emission chamber.

With the Comb Generator, the test engineer can conduct frequent and rapid verifications of the conducted test setup, ensuring the reliability of test results.

Additional potential applications of the CG50/500ML Comb Generator may involve the production evaluation of components, such as cable shields and filters, as well as chamber validation in accordance with CISPR16 & CISPR25 Automobile.

Specifications

Frequency Range	CE: 50kHz - 108MHz for AC / DC LISN (CISPR16 & CISPR25) RE: 50kHz - 30MHz with Monopole Antenna (CISPR25)
Frequency Step	50kHz / 500kHz step switchable for AC / DC LISN & RE with Monopole Antenna
Power Requirements	USB mini, +5 Vdc
Output Connectors	50 ohm, BNC Female
Charging Time	8 - 10 Hours
Usage Time	16 Hours
Size (mm * mm * mm)	Comb Generator 119 * 81.5 * 85.5 Grounding Plane 300 * 300 * 2
Net Weight	1 kg
