ICR 03 set

Near-Field Microprobes Set

Short description

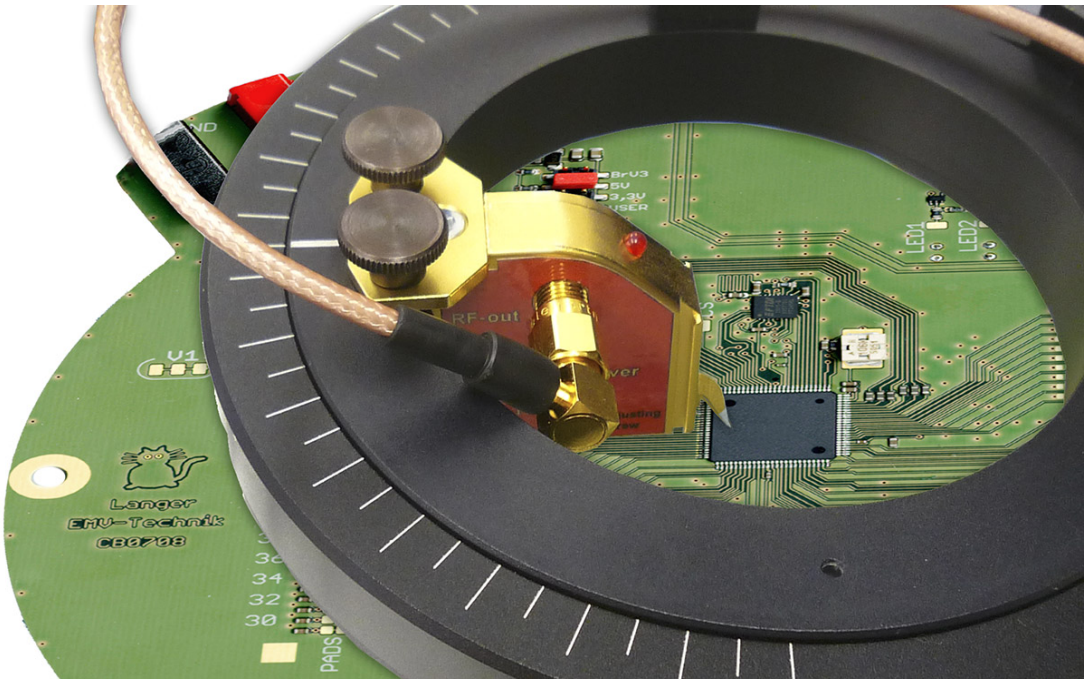

The ICR 03 set contains three of our ICR near-field microprobes (magnetic or E field) of your choice.
The probes are used to measure magnetic or electric near fields with extremely high resolution and sensitivity.
Optimal is a distance of < 1 mm to the measuring object.
The probe head is equipped with either a vertical (HV) or horizontal (HH) measuring coil.
A preamplifier is integrated in every probe, which is powered by the BT 706 bias tee.
