CS-ESA set

ChipScan-ESA Software / USB

Short description

ChipScan-ESA is a software designed to control a spectrum analyzer remotely. The measurement curves are saved and logged in the software. The user can then combine saved curves with other saved curves, correction curves, frequency-dependant functions (curves), or constants into a single curve. Any number of limit value curves can be created or imported and displayed as CSV file. Different curves can be quickly and systematically compared. The functions of the ChipScan-ESA software are valuable to the developer, particularly for spectrum-analyzer measurements taken during the development stage.

Scope of delivery

1x CS-ESA, ChipScan-ESA Software / USB
1x USB, USB Flash Drive
1x Dongle, Licence Dongle

Technical parameters

System requirements	
Operating system	Windows 11/10 64-bit (latest service packs)
Monitor resolution	(1280 x 1024) px
Interface	USB port for dongle
HD space	1 GB
Graphics card	min. OpenGL 4.0
Recommended system requirements	
Processor	Intel Core i5 2 GHz
Memory	2 GB
Graphics card	AMD Radeon 7750

Sales Partner:
ABSOLUTE EMC Llc.
